Portfolio Assignment

Follow the instructions given for this assignment. Save the assignment in your portfolio for submission later.

Career Interview Questionnaire

Now that you have some background information on careers and information about today and tomorrow’s work place, it can be helpful to see how others arrived at their career decisions. Your portfolio assignment is to interview three individuals using the “Career Interview Questionnaires” provided. Only one interview may be with a parent. The other individuals you choose to interview may include someone who has been in the workforce for many years, or someone who is just starting out. I suggest interviewing one individual in each category. You need not interview someone who is in a career you are considering yourself, although it could be interesting.

For this assignment, I expect you to complete all three interviews using family, friends, neighbors, etc. You must ask all questions found on the questionnaire and write the responses legibly on the forms provided. You may wish to use another paper to write down answers during the interview and then write or type a formal report using the assignment form.
Name ____________________________

Career Interview Questionnaire
Portfolio Assignment 1

Name of Person Interviewed ____________________________ Date ____________

Person's Present Occupation ____________________________

Years at Present Employment ____________ Education level ____________________________

Past Occupations:

What did you want as a career when you were in high school? Why did you decide on that career choice?

What made you decide on your present occupation?

What could you have done to better plan for your career (if anything)?

What suggestions do you have for young people facing a career decision?
